FOREWORD FROM FOUNDER

The year 2018 was the momentum of our foundation achievement since 25 villages’ schools have been built to support a maximum of 60 children per year in their early years. These kindergarten projects were examples of multi-stakeholders involvement where the civil society initiatives support the children’s right to quality early childhood education, in cooperation with the villages authorities, the individual or community groups’ and corporate donors, the school’s committees, the teachers, and the children as well. The area coverage were Demak and Grobogan municipalities in Central Java, where 15 schools have been built, and Gunungkidul municipality in the Special Region of Yogyakarta, where 10 schools have also been built during the last seven years.

The physical interventions had led a broader opportunities to community enrichment in the early childhood education. The schools’ infrastructure had become the media to learn basic sanitation, to conserve water and natural resources, to adapt the climate change to the daily life, up to practical knowledge on literacy and the Child’s Right in the early childhood education, under the teacher’s training programs that directly impacted 1024 teachers in the three municipalities including Demak, Grobogan, and Gunungkidul. With abilities to transfer the knowledge in mind, the indirect impact were -/+ 2028 teachers and -/+ 20,500 children who benefitted the program. Cooperation with the municipality governments were also became the year 2018 hallmark in the teachers’ capacity building program.

Children initiatives had enriched the year fund raising effort. Alicia Hartono and Caitlin Wiranata, both 15 years old, charity concert entitled “Build the Future” become a new way in engaging more empathy in cooperation with the Jakarta Conservatory of Music and the Resonanz Music Studio. The community group, Moda for Hope and Eight for Agape were also played an important and significant contribution during the year 2018, and many more individuals who couldn’t be named one by one. Our platform on receiving donation was also enhanced to online payment in cooperation with two reliable, kitabisa.com for national and globalgiving.org for international, crowd-funding partner.

During the year, the new target area had been assessed. The schools were surveyed based on the open existing data from the Ministry of Education and Culture (DAPODIK). The process followed by administration requirements including numbers of children and potential students in the area as well as local authority and the school committees’ commitment. The non-physical externalities were judged by in-depth interview directly with the school principals and head of the villages. This triangulation method was chosen to accurately deliver the right potential beneficiaries. In the 2019, the target area moved to Boyolali municipality.

The Memorandum of Understanding of two schools in the first semester has been signed. The first school in Boyolali MoU has been held between ars86care Foundation and the Charitable Foundation Symphasys based on Switzerland. The second school’s MoU had also been signed between ars86care foundation and Rajawali Foundation. Our sincere gratification to corporates, foundations, community groups and individuals who were constantly support the school program. With the new target area, and the track record of 25 school projects experience, we are confidence to keep on doing our best deliverables program that aims to more social impact to build the mind of the futures.

CONTACT
ars86care foundation started with a group of Indonesian architects who were concerned about the environment and wanted to improve environment quality as legacy for the children. ars86care foundation is a registered foundation for children, education, and the environment with three main programs including Space to Build, Words to Share, and Value to Do. The vision of ars86care foundation is to promote and to create child-friendly spaces in order to achieve a better quality of life for the children. Since 2007, the foundation has worked with more than 1,000 volunteers, 1,076 kindergarten teachers, 6,591 early childhood education accessed our online tutorials, and especially benefitted more than 100,000 children and still counting. 5 titles of My City Series children picture books on urban ethic have been published while 11,819 books had been distributed throughout Indonesia, and 18 kindergarten libraries had been established in Demak municipality. 25 schools had been built accommodating child-friendly school principal where 7 schools located in Demak, 8 schools in Grobogan, Central Java and 10 schools in Gunung Kidul, Special region of Yogyakarta, were embedded with green features to answer global issue, the climate change.

The foundation program to synchronize with the global goal to sustainable development aims through providing quality education (goal 4), clean water and proper sanitation (goal 6), reduce the inequality (goal 10), the climate action (goal 13), and the partnerships to achieve the goal (goal 17) out of the 17 Sustainable Development Goals. Focusing in the quality early childhood education, the demands are still high, while opening to a broader opportunities to bring positive outcomes to social, economy and the environment.
Space-to-Build program provides space for children to learn and play, to grow and develop their full potentials. This program covers physical development in the form of space for children as one step towards environment quality enhancement. Moreover, the program is derived from the fulfillment of children's right based on the United Nation Child’s Right Convention. Space-to-Build aims to early childhood education, where village kindergarten infrastructure provision is becoming our main program until 2020. Acknowledging children as stakeholders, children are encouraged to participate in every stage of the process, including assessment process, design and construction, up to monitoring and evaluation. Currently, geographic area for Space-to-Build is in Central Java (15 schools in Demak and Grobogan municipality) and Special Region of Yogyakarta (10 schools in Gunung Kidul municipality).

**WORDS TO SHARE**

*Words-to-Share* program is aimed to build public awareness on child friendly space and sustainable living concept as a response to today's global change. The target includes decision makers in government, business world, and intergenerational community, especially children. The implementation of the Words-to-Share program includes:

- To create and publish Children Picture Books and any kind of media tools (in the future), such as animation, games, and/or other interactive media
- To conduct research and publish Child Friendly City Guidelines, to advocate national and local government, to train facilitators and tutors
- To conduct research and publish Green Living Tips and Facts in child-friendly brochures, leaflets, and any kinds of media tools.

The activities ranged from book publishing and distributing children picture books on Urban Ethic, conducting Green Living Practical Tips and Child-friendly City Physical Development Guidelines research, teachers training and workshops. Our book’s target distribution is throughout Indonesia, and can be seen at figure below.

VALUE TO DO
Value-to-Do program enlivens the education process with hands-on experience of specific theme within architecture and green living lifestyle. With “do something” attitude in mind, this program encourages children in active learning to apply knowledge in practice. Value-to-Do program activities include planting trees and medicinal plants, separating trash, creating recycle artworks as well as practicing hand wash, save water, save electricity, and more. Corporate volunteering is also our main program that is interlinked with kindergarten projects under Space-to-Build program.
